

The Series 457 Model 316 Quiet-Pac[®] blower package with sound enclosure by Dynamic Air Inc. provides the ultimate in reducing the sound level, down to 85 dBA or less. The complete blower and motor are enclosed in a sound attenuating acoustical enclosure. Four access doors are provided for maintenance of all components. A cooling fan is also included for maximum motor

protection and life. The blower package comes completely preassembled for ease of installation. A heavy-duty frame supports the acoustical enclosure and counterbalanced base and it is complete with vibration mounts as standard. The Quiet-Pac blower package is available in any size desired to suit even the most demanding of applications.
